CAREER OBJECTİVE

I have developed my skills in frontend development and continue to work in this field. I have also worked on significant backend projects and aim to advance my career in both frontend and backend, striving to become a comprehensive developer.

EXPERİENCE

Frontend Developer - Maldia International Technology (January 2023- Present)

Working on user-centric interface design and development, using modern frontend technologies to enhance user experience and performance. *Reference contact details available upon request.*

PROJECTS

E-Commerce Website Development (2024 - Present)

Developing a full-featured e-commerce site using .NET Core 8.0, Entity Framework, SignalR, and Ajax. Includes PayTR integration for secure payments.

AspNet Core 6.0 API for Restaurant Order Management (2024 - Present)

Created a dynamic order management system for restaurants with real-time applications, QR code accessibility, and MSSQL database.

Software Developer - Personal Projects (2024 - Present)

- **Real Estate Data App:** JavaScript web app for filtering and displaying real estate data.
- **ASP.NET Core MVC Pharmacy API:** Developed backend services for managing pharmacy data.
- **MVC5 DbLibrary:** 3-panel library management system using Entity Framework and MVC.

   All my projects are available on my GitHub Profile.
